

Update from Laura Brown on Turnitin

We are working towards signing a contract with Turnitin for a 3-year license. Turnitin will be available to all faculty and students associated with the Ithaca campus. The license will commence on August 24, the first day of classes. However, Turnitin will be online and available once there is a signed contract, likely in early July. Turnitin will be integrated with and available through the new version of Blackboard. Clare van den Blink and her staff will develop instructional materials for both faculty and students. In addition, I will work with them to develop best practices and sample syllabi language for faculty who intend to use Turnitin.
