

Report to The Dean of Faculty, Local Advisory Council
June 2010

Brian R. Crane, Chairman LAC
Associate Professor
Department of Chemistry and Chemical Biology

The Local Advisory Council advises the Vice Provost of Research on nominations for grant and award programs with limited submissions. In the past academic year we reviewed applications to 13 programs, which was a lower number of programs from years past due to a number of granting agencies withdrawing competitions (In 2008-2009 we reviewed 18 programs). Several of Cornell's nominees were successful from this current cycle and many decisions are still pending.
