

Kerry L. Shaw joined the faculty at Cornell in 2007 as Professor in the Department of Neurobiology and Behavior. She received her A.B. from Princeton University in 1985, her PhD in Biology from Washington University in St. Louis in 1993, and previously served on the faculty at Harvard and the University of Maryland. Her research investigates the nature and origin of species, focusing on genetic and phylogenetic behavioral changes that diverge early in speciation. She teaches a variety of courses on the subject of behavior and evolution, at both the undergraduate and graduate levels. She is currently a Fellow in the Public Voices Op Ed project, and in 2017 was elected a Fellow of the Animal Behavior Society.
